

PRODUCENT ROLET I ŻALUZIJI

A black and white photograph of a modern living room. The room features a large window with Venetian blinds, a grey sofa, a coffee table with a bowl and a mug, and a potted plant. A staircase is visible on the left side of the frame. The text 'VENETIAN BLINDS' is overlaid in large white letters on the right side of the image.

VENETIAN BLINDS

Optimal thermal conditions combined with an interesting interior design contribute to the creation of an atmosphere in the room that favours pleasant leisure time.

Blinds are a popular system of internal covers. They are a great protection against the sunshine and the neighbours' gaze.

ADJUSTMENT

There are different widths of slats available, as well as the materials from which they are made. Thanks to this, the blinds can be adjusted to the interior so that they fulfil their function as well as possible.

COMFORT

Closed slats of the blinds darken the room and limit its heating, which creates the desired conditions for relaxation.

CONVENIENCE

Simple operation with a string, remote control, switch or mobile device makes everyday use of the covers easier.

DESIGN

A wide selection of the colours of slats and accessories allows you to create unique covers that perfectly match the style of a given interior.

INSTALLATION

Many options for invasive and non-invasive blinds installation make them suitable for use in almost any interior.

MULTI-FUNCTIONALITY

The possibility to freely adjust the slats angle allows you to control the amount of light entering the room.

Blinds are a type of covers that can be adapted to almost any interior. Convenient ways of controlling the covers ensure comfort of everyday use.

CONTROL

cord

chain

remote

INSTALLATION

NON-INVASIVE - mounted to the window frame

INVASIVE - screwed to the window frame, wall or a ceiling

TYPES OF BLINDS

HORIZONTAL

Aluminium Blinds

Wooden Blinds

VERTICAL

Vertical

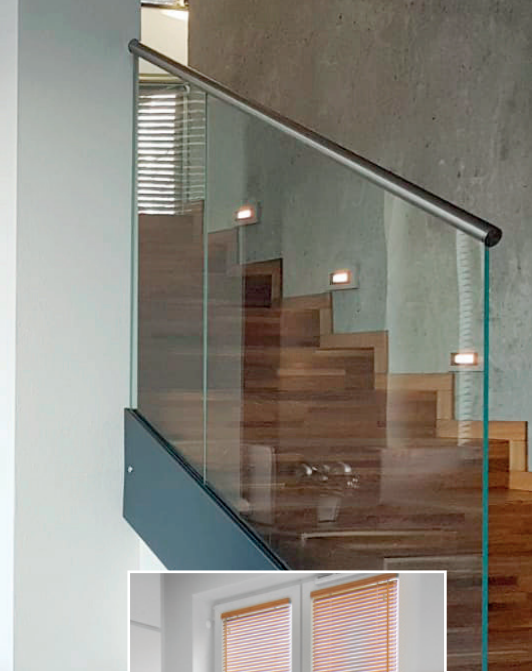

WOODEN BLINDS

A system of internal window covers, which in recent years has been the favourite solution for interior designers. Movable lamella enable controlling the amount of incoming light, which allows you to create a specific atmosphere in the room.

The wooden blinds available are made from Siberian lime, abachi and bamboo. There are three lamella widths to choose from - 25 mm, 50 mm and 65 mm.

basswood 25 mm
laminated 25 mm
bamboo 25 mm

basswood 50 mm
laminated 50 mm
bamboo 50 mm

basswood 65 mm

ALUMINIUM BLINDS

Window covers that provide many possibilities of covering the window space. Movable aluminium lamella can be adjusted to any angle, which enables controlling the amount of light entering the room.

The lamella are available in various colours. The available lamella widths are 16 mm, 25 mm and 50 mm.

We also offer blinds in a version with perforated lamella. This option allows to let more sunlight into the interior.

standard 16 mm

standard 25 mm

perforated 25 mm

wood effect 25 mm

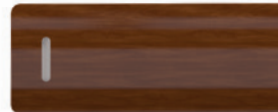

standard 50 mm

perforated 50 mm

wood effect 50 mm

VERTICAL BLINDS

A type of internal covers composed of vertical rotating lamella. This system is ideal for covering large areas, such as public buildings - offices, auditoriums or conference rooms.

The lamella are available in a wide range of colours and in two sizes: 89 mm and 127 mm.
