Design variants

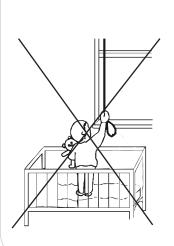

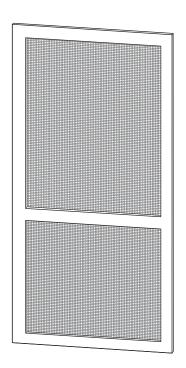

No bar With a pet crossing

With a kicker

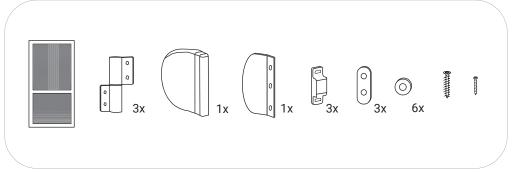

Warning!!!

Small children may become strangled in the loops of strings, chains, tapes and internal cords that control the product. To prevent strangulation and tangles, keep strings out of the reach of small children. The strings can get wrapped around the baby's neck. Move beds, cots and furniture away from the window area with strings. Do not tie the strings together. Make sure the strings are not twisted or looped.

Set contents

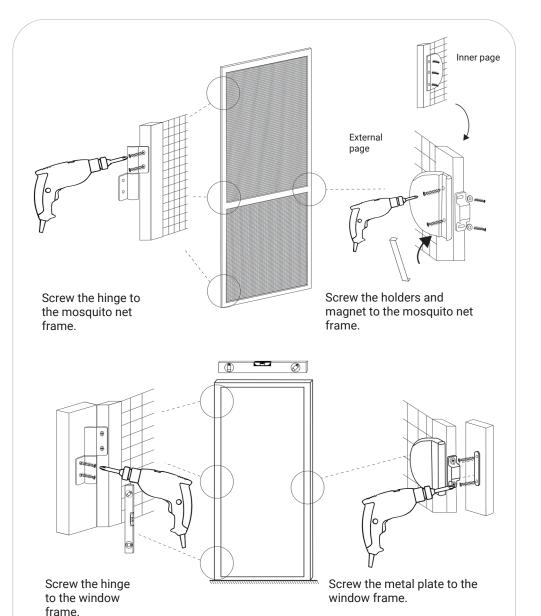

^{*}The contents of the set may vary depending on the selected mosquito net configuration.

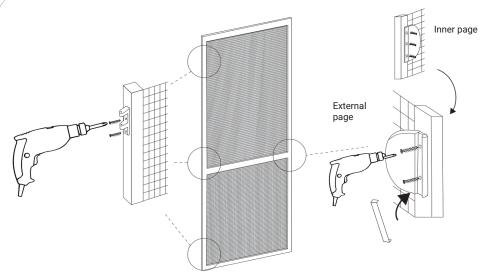

Assembly with large hinge and magnet

^{*} The mosquito net should be centered on the door frame in such a way that it covers the entire window opening.

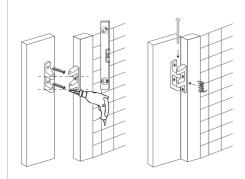

@Fill

Alternative assembly - small hinge and magnetic tape

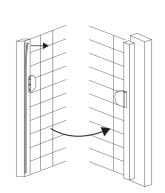

Screw one part of the hinge to the mosquito net frame.

Screw the handles to the mosquito net frame and apply the steel tape to the magnetic tape in the mosquito net.

Screw the second part of the hinge to the window frame, then place the spring between the hinges, connect everything with the pin.

Remove the protection and stick the steel tape to the window frame in such a way that it is not visible when the mosquito net is closed. Wait 1 minute for the glue to set.

* The mosquito net should be centered on the door frame in such a way that it covers the entire window opening.
